

A woman with dark, wavy hair is shown in profile, looking down. She is wearing a green sari with a gold border and a gold blouse with a lace-like pattern. She is adorned with a large, ornate gold necklace featuring multiple strands of pearls and gold beads, and a large, round, gold ring on her finger. The lighting is dramatic, with strong highlights and shadows.

Tussar silk

## *Tussar silk*

A variation of the process exists in which the silk worms are allowed to leave before the cocoons are soaked in boiling water to soften the silk and then the fibers are reeled. Single shelled, oval-shaped cocoons are collected and then boiled to extract the silk yarn. Boiling is a very important part in the manufacturing of silk.

Boiling is a very important part in the manufacturing of silk.

A woman with curly hair, wearing a green and gold sari, is shown working with silk. She is holding a piece of green fabric, possibly a cocoon or a small piece of yarn, and is looking down at it with a focused expression. The background features a window with colorful glass panes in shades of yellow, orange, and pink, and a traditional Indian architectural style with intricate carvings. The lighting is warm and dramatic, highlighting the woman's face and the texture of the silk.
